

B&M DISTRIBUTION CENTRE EXTENSION

MetStructures were contracted by the ADI Group to undertake the design, detailing, fabrication, and erection of steelwork and cold-rolled sheeting rails for the extension to an existing warehouse.

Works also included the formation of new openings to the existing warehouse elevations. The completed warehouse is operated by discount chain store B&M Stores.

WORKS CARRIED OUT:

- Frame & connection design
- Detailing, fabrication and erection of structural steelwork and cold-rolled rails
