

LONGBRIDGE 155, THE COFTON CENTRE

The Cofton Centre is a 14,811sqm building and forms an integral part of the largest regeneration project in the West Midlands. Situated only 1.5 miles from St. Modwen’s new £70 million Longbridge town centre and the highly successful Technology Park.

MetStructures were contracted by GMI Construction to undertake the design, detailing, fabrication and erection of 600 tonnes of steelwork for the new warehouse Unit. Scope of works also included the installation of precast concrete lift-shafts and stairs.

FEATURES

- **Frame & Connection Design**
- **Detailing, Fabrication and Erection of Structural Steelwork and Cold-Rolled Rails**
- **Metal Decking and Precast Stair and Lift Shaft Installation**
